1 Introduction

The Annual Report 2006 is the third Annual Report of the Faculty of Informatics and Information Technologies, Slovak University of Technology (FIIT STU) so that a reader can not only see the results reached by the Faculty in the year 2006, but he can also compare the results with those reached by the Faculty in previous years and a development of the Faculty as well. The Annual report 2006 shows how FIIT STU fulfilled expectations of IIT community in the fields of education and research, and how it has been managed. Following the long-term strategy of the Faculty development the new study programmes and the new research activities have been promised. These activities required suitable conditions – to extend human resources, to improve services, to build new laboratories. Therefore our first priority was to have comparable working conditions as our colleagues from other Faculties of STU have.

The evaluation of the Long term strategy for the year 2006 showed that almost all tasks for this year have been successfully fulfilled. We are proud that there is a high interest from the side of secondary schools students to study the study programmes we have prepared for them at our Faculty and that our graduates have no problem to find suitable job.

The Report shows the results achieved in research that is of high priority at FIIT STU. Interlink of research and education is not only declared but also documented by research activities of our students. The research results of our students have been presented at the 2nd Student Research Conference organised. But what is even more important, some of them were published in international journals or presented at conferences.

Unfortunately we have not been so successful in all our activities. Due to lack of room capacity for the staff as well as for the laboratories many activities have been slowed down or even stopped at all. Therefore all academic staff of the Faculty as well as all our students welcomed activities of the Rector of STU prof. Ing. Vladimír Báleš, DrSc. leading to the Project of the new building of the FIIT STU. We were also very pleased by the declaration of the new minister of education prof. Ing. Jan Mikolaj, PhD. at the opening ceremony of the new academic year 2006/2007 that Ministry of education SR is prepared to build up the new building for the FIIT STU. We see this declaration fully consistent with the government program to build up inclusive information society and knowledge economy in the Slovak Republic.

The Report shows the current state the Faculty has achieved in education, research and cooperation with business partners. It also shows the current stage in the long-term strategy of the Faculty development.

Prof. Štefan Bujok
Dean of the FIIT STU
2 Faculty Management Bodies

According to the Act No. 131 of February 21, 2002 of the University Code and Amendments and Supplements to some Acts and subsequent acts that have amended them, the faculty management is to be formed out of its academic community members. It is composed of lecturers and research workers (representing the employee part of the academic community of the faculty) and of students (representing the student part of the academic community of the faculty).

According to the University Code, academic management bodies of a faculty are the following:

a) the Academic Senate of the faculty,

b) the Dean,

c) the Scientific Board of the faculty,

d) the Disciplinary Commission of the faculty for students.

2.1 Academic Senate of the Faculty

The Academic Senate of a faculty is a representative body of the faculty. It is divided into the employee part and the student part.

Members of the Academic Senate in 2006

Presidium of the Academic Senate
presidium@as.fiit.stuba.sk

Pavol Návrat, Professor
chair
chair@as.fiit.stuba.sk

Milan Kolesár, Professor
chair of the employee part

Ján Máté
chair of the student part

1 as in December 2006; the Academic Senate has been changed in the year of 2006 according to the Rules of election of its members.
Secretary of the Academic Senate
secretary@as.fiit.stuba.sk

Martina Chabadová
Michal Ďurfína
Ján Máté
Tomáš Minčeff

Activities of the Academic Senate of the Faculty in 2006
The Academic Senate of the Faculty of Informatics and Information Technologies in 2006
− discussed the proposal of study programmes of the Faculty presented by the Dean,
− approved the additional conditions for admission to the study programmes offered by the faculty, presented by the Dean,
− approved the budget of the Faculty, presented by the Dean,
− approved the annual report on activities and annual statement on economic management of the Faculty, presented by the Dean,
− submitted the annual report on its activity to the academic community of the Faculty.

Prof. Pavol Návrat
Chair Academic Senate FIIT STU

2.2 Dean
The Dean is the representative of the Faculty who manages, represents and acts on behalf of the faculty. The current Dean was elected by the Academic Senate of the Faculty in its meeting held on December 12, 2003 for a four year office period.
2.3 Scientific Board of the Faculty

Members of the Scientific Board in 2006

Chair of the Scientific Board
  Ľudovít Molnár, Professor

Deputy chair of the Scientific Board
  Mária Bieliková, Professor

Members from the academic community of the Slovak University of Technology
  Mária Bieliková, Professor
  Pavel Čičák, Assoc. Professor
  Peter Farkaš, Professor
  Pavol Horváth, Professor
  Ladislav Hudc, Assoc. Professor
  Milan Kolesár, Professor
  Margaréta Kotočová, Assoc. Professor
  Tibor Krajičovič, Assoc. Professor
  Vladimír Kvasnička, Professor
  Ľudovít Molnár, Professor
  Pavol Návrat, Professor
  Zdenka Riečanová, Professor
  Martin Šperka, Assoc. Professor
  Vladimír Vojtek, Professor

---

2 as in December 2006; the Scientific Board has been changed in the year of 2006 according to the Rules of election of its members.
External members

Milan Češka, Professor – Brno University of Technology
Ladislav Hluchý, PhD. – Institute of Informatics, Slovak Academy of Sciences
Štefan Kimlička, Professor – Comenius University in Bratislava
Josef Kolář, Assoc. Professor – Czech Technical University in Prague
Milan Krokavec, Professor – Technical University of Košice
Karol Matiaško, Assoc. Professor – University of Žilina
Stojan Russev, Professor – University of Economics in Bratislava
Štefan Kimlička, Professor, Comenius University in Bratislava (deceased)
Jiří Šafařík, Professor – University of West Bohemia in Pilsen

Honorable members

Norbert Frištacký, Professor – Slovak University of Technology in Bratislava
(deceased)

Activities of the Scientific Board of the Faculty in 2006

The Scientific Board of the Faculty of Informatics and Information Technologies in 2006

− discussed an update of the long-term strategy of the Faculty development for the 2006 prepared in accordance with the long-term strategy of the Slovak University of Technology in Bratislava,

− evaluated the level of the Faculty regarding its educational activity and activities in the field of science and technology,

− discussed and approved the proposal of the study programmes for the academic year 2006/2007 offered by the Faculty,

− endorsed other experts with the right to conduct Final examinations in the study programmes offered by the Faculty (in accordance with the University Code),

− approved new member of the Board of Specialists in the Computer Engineering study PhD programme,

− discussed and submitted to the Scientific Board of the university proposals for nomination of "professors" to:
  • Jiří Pospichal in the field of science Applied Informatics (Institute of Applied Informatics, Faculty of Informatics and Information Technologies, Slovak University of Technology in Bratislava),

− discussed and approved the proposal for habilitation of "docents" to:
  • Elena Gramatová in the field of science Applied Informatics (Institute of Informatics, Slovak Academy of Sciences in Bratislava; Institute of Computer Systems and Networks, Slovak University of Technology in Bratislava),

− approved the Dean's proposals for filling posts of "hostujúci docents" to:
  • Tomáš Seidmann (Cdot AG, Wilen, Switzerland; Institute of Informatics and Software Engineering, Faculty of Informatics and Information Technologies, Slovak University of Technology in Bratislava)
- Lubor Šešera (Softec, s.r.o., Bratislava, Slovakia; Institute of Informatics and Software Engineering, Faculty of Informatics and Information Technologies, Slovak University of Technology in Bratislava)

  – conferred the academic degree „philosophie doctor“ on:
  - Michal Laclavík (Applied Informatics)
  - Martom Kardoš (Computer Hardware and Systems)
  - Zoltán Fazekas (Program and Information Systems)
  - Ladislav Huraj (Applied Informatics).

Prof. Ľudovít Molnár
Chair Scientific Board FIIT STU

2.4 Disciplinary Commission of the Faculty for Students

The Disciplinary Commission of a faculty according to the University Code shall discuss misdemeanours of students and submit the proposal to the Dean who will resolve on it.

Members of the Disciplinary Commission in 2006

Chair of the Disciplinary Commission of the Faculty
Ladislav Hudec, Assoc. Professor

Members of the Disciplinary Commission of the Faculty
  Juraj Štefanovič, PhD.
  Ivan Kapustík
  Ján Žiak – student of the doctoral degree programme
  Tomáš Vanderka – student of the master degree programme
  Michal Žurfina – student of the bachelor degree programme
3 Study

3.1 Undergraduate Study (Bc)

In the academic year 2005/2006 two accredited study programmes with regular length three years were offered:

- Informatics,

- Computer Systems and Networks (as an orientation in Computer Engineering).

Students in the “old” programme Informatics with regular length of four years progressed to study in two specialisations (study majors) – Software Engineering and Computer Engineering. This programme is accredited by the British Engineering Council following an accreditation process carried out by the Institution of Electrical Engineers (UK).

The following table shows the numbers of full-time bachelor programme students throughout the study (from the first to the final year). In the academic year 2002/2003 the students of the Telecommunication specialisation (the specialisation at the FEI STU) were included in the numbers of students (except of the first year).

</table>

On the course we have 4 overseas students.

In the academic year 2005/2006 the students in “old” programme Informatics and first time the students in the both study programmes defended their bachelor theses and passed the final examination. The number of all graduates was 161 (108 in “old” programme, 27 in study programme Informatics and 26 in study programme Computer Systems and Networks).

\(^3\) only the students in programme Informatics
The following students were conferred awards for their excellent study results:

- **Dean’s Award – “Magna cum laude”**: Michal Bebjak, Michal Dobiš, Vladimír Hlaváček, Ivan Kišac, Michal Kurťák, Michal Makový, Richard Schwartz, Michal Šimún,
- **Dean’s Award – “Cum laude”**: Stanislav Angelovič, Viktor Bachratý, Viktor Tlacháč, Juraj Staník, Marek Tomša, Oto Vozár,
- **Dean’s Award for Excellent Bachelor Thesis**: Michal Dobiš, Michal Kurťák, Michal Šimún,
- **Dean’s Praise Letter for Bachelor Thesis**: – Stanislav Angelovič, Michal Bartal, Zuzana Božoňová, Anton Frlička, Martin Kováčik, Matúš Kováčik, Peter Mešjar, Peter Mišák, Michal Okresa, Radko Štulrajter, Viktor Tlacháč, Marek Tomša, Jakub Vaňo, Richard Veselý.

1 181 applicants took place in the entrance examination to bachelor study programmes on April 11-12, 2006. The written examination consisted of mathematics and informatics with orientation on algorithmic and logic thinking (25 tasks, 75 points max.). 532 applicants were offered admission (366 Informatics, 166 Computer Systems and Networks), 332 out of them actually made use of it and were enrolled (221 Informatics, 111 Computer Systems and Networks).

### 3.2 Master Study (Ing)

In the academic year 2005/2006, FIIT STU offered three accredited study programmes:

- **Software Engineering** – regular length two or three years[^4].
- **Computer Systems and Networks** (as an orientation in Computer Engineering) – regular length two or three years[^5],
- **Information Systems** – regular length two or three years[^5].

The study programme Information Systems was offered in first time.

The “old” Informatics graduate study programme (with regular length three semesters) was offered too, but not for newly admitted students. The programme consists of two specialisations (study majors) – Software Engineering and Computer Engineering This programme is accredited by the British Engineering Council following an accreditation process carried out by the Institution of Electrical Engineers (UK).

### Numbers of the full-time master programme students

</table>

On the course we have 4 overseas students.

[^4]: three years for students who have not obtained their first degree in related field.
Only one student studied in “old” programme Informatics and he successfully defended his master thesis and passed the final examination in spring semester 2005/2006. In study programmes 37 students graduated in spring semester 2005/2006 and 58 students in autumn semester 2006/2007:

- 54 graduates in Software Engineering,
- 29 graduates in Computer Systems and Networks and
- 12 graduates in Information Systems.

In autumn semester 2006/2007 first cohort of study programme Information Systems defended their master theses and passed the final examination.

The following students were conferred awards for their excellent results:

- **Dean's Award “Magna cum laude”:**
  Dalimír Orfánus (spring semester),
  Michal Tvarožek (autumn semester),

- **Dean's Award “Cum laude”:**
  Peter Khandl, Michal Kubík, Peter Nagy (spring semester),
  Michal Barla, Peter Bartalos, Michal Jemala, Peter Kasan, Peter Kiselkov (autumn semester),

- **Dean’s Award for Excellent Master Thesis:**
  Peter Nagy (spring semester),
  Michal Barla, Peter Bartalos (autumn semester, proposal),

- **Slovak Academy of Sciences Award for Excellent Master Thesis:**
  Jakub Mažgut (spring semester),
  Peter Kiselkov, Martin Komara (autumn semester, proposal),

- **Tatra Bank Award for Excellent Master Thesis:**
  Michal Tvarožek (proposal)

- **Dean's Praise Letter for Master Thesis:**
  Tomáš Backo, Michal Barla, Peter Bartalos, Peter Kiselkov, Martin Komara, Michal Kubík, Jakub Mažgut, Peter Nagy, Dalimír Orfánus, Peter Pullmann, Rastislav Solin, Ján Suchal, Kristián Szobi, Michal Tvarožek.

186 applicants took part in an entrance examination on July 7, 2006 as a prerequisite to the master programmes. 173 students were offered admission (69 Software Engineering, 67 Computer Systems and Networks, 37 Information Systems), 171 out of whom were enrolled.

### 3.3 Doctoral Study (PhD)

Quality and number of doctoral students significantly influence the results obtained in research. We observe an insufficient number of doctoral students in the fields of informatics and information technologies. The graduates have excellent opportunities in finding positions in the labour market, therefore, even if they are interested in further studies they often prefer to be admitted as part–time students. This trend has been slightly reversed now. The number of full-time doctoral students is on an increase, however in 2005 is on the same level as in 2004.

---

5 Several awards are conferred once per academic year – the selection is made according proposals.

In 2006 one dissertation was defended:

- Martin Kardoš: Automated formal verification for UML-based model driven design of embedded systems
- Zoltán Fazekas: Improving Variability in Software Configuration by Separation of Concerns
- Ladislav Huraj: Implanted chain certificate in distributed environment

In 2006 the FIIT STU admitted students for study in newly accredited study programmes in doctoral study for the second time. Four accredited study programmes are currently offered:

- Applied Informatics,
- Computer Systems and Networks (as an orientation in Computer Engineering),
- Program Systems (as an orientation in Software Engineering),
- Artificial Intelligence.

Regular length of all doctoral study programmes is 3 years for full-time study and 5 years for part-time study.

3.4 Student Conferences and Competitions

The Faculty organised in 2006 several student competitions and conferences. The importance of involvement of the students in such events is very high. Students took active participation in various technical and research activities (co)organised by the Faculty:

- ACM International Collegiate Programming Contest 2006,
- ACM CZ Student Research Competition 2006,
- IEEE Computer Society International Design Competition (CSIDC 2006),
- ProFIIT 2006 – Programming Competition for Secondary School Students,
- RoboCup 2006, Soccer Simulation League,
- IIT.SRC 2006 – Informatics and Information Technologies Student Research Conference (to be mentioned in the following section devoted to research in more detail).

Assoc. Prof. Margaréta Kotočová
Vice-Dean for Education (first and second levels)

Prof. Mária Bieliková
Vice-Dean for Research (including the third level education)
4 Research

4.1 Research Areas

The economic and social development is featured by an exponential growth of new scientific knowledge today. Informatics and information technologies are playing the key role. They boost the development of all scientific branches with the creation of new methodological base to do research and development. The development time decreases and the traditional theoretical and experimental abilities are extended broadly.

Informatics has developed to be an autonomous scientific area, which supports success not only in the branch of information technologies, but it also has wide consequences as for the lives of individuals and society. It is not a mere coincidence that research in the IIT area has become the priority among the research topics in the European Union. The research at FIIT STU is oriented on these main research areas that respect the organisation, existing technical and laboratory equipment and professional skills:

- collaborative access, analysis and presentation of documents in the world-wide-web by the use of modern software tools,
- information development in distributed environment of intelligent agents,
- methods and tools for software systems development,
- the use of computer graphics in virtual and augmented reality systems,
- “echo state” neural networks and recurrent neural networks,
- application of evolutionary algorithms in theory of multi-agent systems,
- the methods and tools for security and administration of network and mobile computer systems,
- parallel systems for real-time computing,
- the design methods and tools for application-specific digital systems,
- formal methods and tools for design and description of digital systems,
- embedded computer systems,
- fault-tolerant high-speed parallel and distributed computer structures.

4.2 Scientific Activities

In the year 2006, FIIT STU has organised or co-organised several scientific events:

- scientific conference Cognition and Artificial Life VI,
- scientific seminar Technology for e-learning.
international congress ITAPA 2006 – Congress on Information Technologies and Public Administration,

international scientific conference SCCG 2006 – 22nd Spring Conference on Computer Graphics,

international scientific conference SOFSEM 2006 – 32nd Theory and Practice of Computer Science,

scientific conference Theory and Practice of Information Technology – ITAT 2006,

scientific workshop Tools for Acquisition, Organisation and Presenting of Information and Knowledge held in conjunction with ITAT 2006,

international scientific conference ITI 2006 – 28th International Conference on Information Technology Interfaces.

The Faculty took part in providing technical and scientific programmes, especially through the work in programme committees of about 30 conferences, mostly international:

− ADBIS, East-European International Conference on Advances in Databases and Information Systems,

− AIAI, Artificial Intelligence in Theory and Practice (part of the IFIP World Computer Congress),

− Baltic BC&IS, International Baltic Conference on Databases and Information Systems,

− CESC, Central European Seminar on Computer Graphics,

− CSIT, Computer Science & Information Technology, Special Session on Dynamic Networks,

− Cognition and Artificial Life, Annual Conference on Cognition and Artificial Life,

− Conference on Data Security,

− DATAKON, Annual Conference on the Current Trends in Databases and Information Systems,

− DDECS, IEEE Workshop on Diagnostics and Design of Electronic Circuits and Systems,

− ECDL, European Conference on Research and Advanced Technology for Digital Libraries,

− ECI, International Conference on Electronic Computers and Informatics

− IADIS, Virtual Multi Conference on Computer Science and Information Systems – Intelligent Systems and Agents,

− ICIT, International Conference on Information Technology

− ICCS, International Conference on Computer Science

− ICCT, International Conference on Communication Technology

− ISD, International Conference on Information Systems Development,

− ISIM, International Conference on Information Systems Implementation and Modelling,
In 2006, FIIT STU organised or co-organised several events oriented to exhibition of research work of students (accomplished in the student projects). Above all, it was the students’ research conference – IIT.SRC 2006 – which was held on April 26, 2006.

65 students presented 43 research projects arranged in following sections:

- Artificial Intelligence and Computer Science,
- Information Processing and Web Technologies
- Security and Computer Networks
- Software Engineering and Multi-agent Systems
- Information Systems, E-learning, Applied Informatics

The excellent student papers were awarded. The best paper award was conferred to:

- category of doctoral students Michal Takács (Fighting a Bank Spoofing Attack: An out of Page Security Channel, supervisor V. Vojtek) and Ján Máté (Computing Environment for Active File System, supervisor J. Šafařík),
- category of master students Michal Tvarožek (Personalized Navigation in the Semantic Web, supervisor M. Bieliková)
- category of bachelor students Michal Dobiš, Marek Tomša, Richard Veselý (NatuLore: System for Collaborative Publishing and Sharing of Contextual Information for Protecting Environment, supervisor M. Bieliková)

Dean’s award was the highest appreciation. It was conferred to:

- Marek Neupauer (Analyses of Medical Data Using Interactive Evolutionary Computation, supervisor R. Jakša, Technical University Košice),
- Jozef Slezák (Estimating Software Quality by Small World Graph Concepts, supervisor R. Filkorn),
Martin Adam, Imrich Balko, Rudolf Dačo, Michal Habala, Ondrej Hluchý, Tomáš Klempa (Database of Student’s Knowledge and Skills, supervisor V. Grlický),

– Michal Barla (Interception of User’s Interests on the Web, supervisor M. Bieliková).

The finals of the 4th ACM CZ Student Research Competition were organised in November 2006 in Prague. Ten best bachelor and master student projects from 7 universities from the Czech Republic and Slovakia were presented. The project

– NatuLore: System for Collaborative Publishing and Sharing of Contextual Information for Protecting Environment authored by our undergraduates Michal Dobiš, Marek Tomša and Richard Veselý (supervisor M. Bieliková)

won the 1st place.

### 4.3 Publications

Results of our research were published in 128 papers, which represents an increase in comparison with 2005. 94 scientific contributions were published in conference proceedings, 66 out of which were published in reviewed proceedings of international conferences. 17 scientific contributions were published in scientific journals and we have authors (co-authors -editors) of 4 books.

FIIT STU is a co-publisher of the international scientific journal „Computing and Informatics“ (until 2001 Computers and Artificial Intelligence). Two faculty staff members, Prof. Návrat and Prof. Kvasnička were members of its editorial board in 2006.

4.4 Research Projects

Research projects constitute an important basis for research realization and research funding. Life cycle of a research project includes its preparation, submission, acceptance of the project followed by the project realization. Because these periods take often several years, activities in certain period influence significantly results in the following period.

Projects of the Scientific Grant Agency of the Ministry of Education of Slovak Republic and the Slovak Academy of Sciences (VEGA) and of the Slovak Research and Development Agency (APVV) formed an essential form of research organisation and scientific projects funding at the FIIT STU. In 2006 four VEGA projects and four APVV projects progressed. One VEGA project was completed in 2006 and one new project was prepared and approved for funding in 2007-2009. Two new APVV projects were prepared and one was approved for funding 2007-2009.

One project of the Cultural and Educational Grant Agency of the Ministry of Education of Slovak Republic (KEGA) was completed and three others progressed in 2006. One new KEGA project was prepared and approved for funding. These projects are described in reports of institutes presented in the following parts.

The Faculty under the leadership of P. Návrat and V. Rozinajová participated in two and under the leadership of M. Šperka in one international project.

The projects were realized in research laboratories (description can be found in the parts devoted to individual institutes). In 2006 the following six research laboratories were included in the Slovak University of Technology network of high-tech laboratories:

- Laboratory of Database Technologies, head: V. Vojtek,
- Intelligent Systems Laboratory, head: P. Návrat,
- Advanced Software and Web Technologies Laboratory, head: M. Bieliková,
- Computer Networks Laboratory, head: P. Čičák,
- Embedded Systems Laboratory, head: T. Krajčovič,
- VLSI Design Laboratory, head: J. Hudec.
FIIT STU raised funds for several IT development projects supported by the Ministry of Education of Slovak Republic:

- Project studio for software development for mobile devices, project leader: M. Bieliková
- Laboratory of advanced information and communication technologies, project leader: V. Vojtk
- Project studio for final bachelor projects in informatics and information technologies, project leader: T. Krajčovič
- Project Centre of global network technologies, project leader: P. Čičák,
- Wireless access to FIIT computer network, project leader: B. Steinmüller

Prof. Mária Bieliková
Vice-Dean for Research
Cooperation of FIIT STU can be characterised from several viewpoints as cooperation with secondary schools, other higher education institutions, research institutes and cooperation with industry (a list of cooperating institutions can be found in the parts devoted to individual institutes).

5.1 Cooperation with Secondary Schools

Cooperation with secondary schools lies in preparation for study at the university especially at the FIIT STU, organising a programming contest ProFIIT, and in technical cooperation. Technical cooperation with secondary schools is achieved especially through the Networking Academy programme. FIIT STU, as the Regional Networking Academy, guarantees publicity, programme quality, guidance of Local Academies, and regular technical training and consultations for teachers/instructors of secondary schools. In this way the Faculty leads, methodologically supervises and technically trains 19 secondary schools. In 2006 our faculty participated on the first annual set of CiscoOlymp2006 contest. One of the very successful activities is yearly organised Open Day.

5.2 Cooperation with Industry

Cooperation with industry is oriented towards training and consultation activities and educational cooperation.

Training and Consultation Activities

FIIT STU has been very successful in training and consultations in cooperation with the companies Cisco System Slovakia Ltd., Microsoft Slovakia Ltd. and GTEC Ltd. In cooperation with Cisco Systems the Faculty has been integrated into the world-wide academy programme oriented to training in network technologies. Nowadays FIIT STU Regional Networking Academy offers a full 4-semester programmes CCNA (Cisco Certified Networking Associate) and CCNP (Cisco Certified Networking Professional). Two instructors of our RCNA are trained in Birmingham thanks to remarkable support of the company Tronet Ltd. and DITEC Ltd. Except above mentioned programmes FIIT STU offers programmes for IP Telephony, WiFi Communication, Network Security and other special courses. In a similar way, in cooperation with Microsoft, FIIT STU joined in 2006 to the IT Academy Program.

In co-operation with GTEC Common Training and Consultation Centre (CTCC) offers various programmes. The main purpose of this centre is to offer technical training for the
non-academy sphere. In 2006 there were introduced a new equipped not only by a special net technology but by a special programming and reconfigurable circuits as well. That means there are now three Special Laboratories in this CTCC.

Educational Cooperation

In the field of education and other activities the Faculty has been cooperating with important Slovak companies for many years. Academy training programmes were developed thanks to the support of cooperation with Tronet Ltd., BGS Ltd., DITEC Ltd., DATAKAN Ltd., ASSET Ltd., HP Slovakia Ltd, Goldstein Fuchs, Asbis.

Some of above mentioned companies has directly co-operated on faculty education.

Other remarkable support the Faculty has obtained in cooperation with IBM Slovakia, Microsoft Slovakia, SUN Microsystems, SIEMENS and ORACLE. Cooperation with the above mentioned companies is based on special agreements.

5.3 Mobility programmes

FIIT STU has established various international relations for the purposes of students’ and teachers’ mobility. Cooperation within the mobility programme Socrates/Erasmus is supported under these contracted agreements:

- Ghent University, www.ugent.be
- Ruhr-University Bochum, Faculty of Electrical Engineering and Information Technology, www.atp.ruhr-uni-bochum.de
- University of Maribor, Faculty of Electrical Engineering and Computer Science, Slovenia, Institute of Informatics, www.feri.uni-mb.si
- Brno University of Technology, Faculty of Information Technology, Czech Republic, www.fit.vutbr.cz
- FH Nordakademie, Elmshorn, www.nordakademie.de
- TU Vienna, Vienna University of Technology, Faculty of Electrical Engineering and Information Technology, www.tuwien.ac.at
- Växjö University in Sweden, School of Mathematics and Systems Engineering, www.vxu.se
- Universität Leipzig, www.uni-leipzig.de
- Universidad Politécnica de Madrid, Facultad Informática-UPM, www.fi.upm.es
- Tallinn University of Technology, www.ttu.ee

In 2006, three incoming Erasmus students have visited FIIT STU (from Brno, Madrid and Maribor) and two our teachers were visiting the ISEP Paris. In 2006 17 students of our faculty have applied for Erasmus-mobility abroad.

Besides the Socrates agreements, a special agreement of cooperation was established with the Institut Supérieur d’Electronique de Paris (ISEP). Based on this agreement, students
from ISEP will be visiting FIIT STU each summer for the training period of 1 month (July) to do their mandatory students’ internship. In summer 2006 we hosted 9 students.

In December 2006, a group of students from Hochschule Liechtenstein – Institut für Wirtschaftsinformatik, www.hochschule.li/wirtschaftsinformatik has visited our university having one day of excursion and there is an interest about the future contacts.

Assoc. Prof. Pavel Čičák
Vice-Dean for Public Relations

Juraj Štefanovič, PhD.
Socrates Erasmus Coordinator
6 Faculty Services

6.1 Information and Library Services

Centre for Information and Library Services at the Faculty of Informatics and Information Technologies (CIKS) provides information services for study and research purposes at FIIT STU.

The book catalogue contains more than 5,700 items, which are freely available in the Library. The catalogue can be found on http://olib.cvt.stuba.sk. The Centre for Information and Library Services purchased and acquired thanks to donation 49 titles of professional journals (mainly ACM, IEEE membership) in various languages (5 out of them are in Slovak). Journals and selected books are located in the Study Room.

The information services make available, within the FIIT STU environment, 12 external electronic databases (Science Direct, ACM Digital Library, EEE Computer Society Digital Library, EI Engineering Village 2, EIFL Direct – EBSCO host, IoP Electronic Journals, Journal Citation Report, Oxford Reference Online, The Scientific World, Web of Science, Wiley Encyclopedia of Electrical and Electronics Engineering), include several fulltext accesses.

The Centre for Information and Library Services also covers loan of the books and magazines and lending basic assistance besides information search.

6.2 Computing and Communication Services

The Centre for Computing and Communication Services at the Faculty of Informatics and Information Technologies provides the following services for educational and research purposes at FIIT STU:

- functioning of the Faculty computer network,
- new computers, printers, scanners etc. installation,
- operation systems and specialized software installation,
- upgrading and maintenance of computers,
- services for faculty wire and wireless access points to the Internet,
- functioning of the camera security system,
- data-projectors installation.

The Faculty computer network is based on a structured cable system and it is using 100 Mbps transfer speed. It consists of approximately 120 personal computers of the faculty
staff and PhD students, 160 personal computers and workstations in the education and re-
search laboratories and 20 specialized servers.

The Centre for Computing and Communication Services also provides full service for 
educational computer laboratories and full or partial service for research laboratories of the 
institutes.

Assoc. Prof. Tibor Krajčovič
Vice-Dean for Development
7 Institute of Applied Informatics

E-mail: uapi@fiit.stuba.sk
Web: uapi.fiit.stuba.sk
Tel: +421 2 654 22 707
Fax: +421 2 654 20 587

The institute specializes in the area of applied informatics. The scientific and professional activities of the institute concentrate mainly on the area of database systems, data mining, information processing in distributed environment of intelligent agents; further topics of interest lay in application of computer graphics in virtual reality systems and in systems of enhanced reality, in visualization and human–computer interaction; and in the area of computational intelligence (neural networks, evolutionary algorithms, artificial life, simulation of social systems).

The institute is responsible for the following degree programmes:
- Informatics (master degree),
- Applied informatics (doctoral degree).

### 7.3 Theses

**Bachelor (Bc.) Theses**

- Bachratý, Viktor: *Solving a brainteaser using a symbolic and subsymbolic approach of artificial intelligence*. May 2006. Supervisor: P. Lacko
- Buchta, Marian: *Evolutionary minimizes of Boolean function using Quine and McCluskey method*. May 2006. Supervisor: V. Kvasnička
- Homola, Michal: *Using of evolutionary algorithms to solve an astrophysical problem*. May 2006. Supervisor: P. Lacko
- Jónás, Márk: *Communication network as a graph of “small world”*. May 2006. Supervisor: M. Markošová
- Kišac, Ivan: *Determination of characteristics of network connection in range of Slovak Republic based on IP address*. May 2006. Supervisor: M. Makula
- Košťál, Michal: System for support of building exam schedules. May 2006. Supervisor: M. Galbavý
- Kušnír, Štefan: Development of player's behaviour against a static opponent in a team game. May 2006. Supervisor: J. Žiak
- Mišák, Peter: Emergence of agent cooperation. May 2006. Supervisor: P. Lacko
- Okresa, Michal: Support for automated program evaluation. May 2006. Supervisor: B. Steinmüller
- Péti, Peter: Webportal for student project management. May 2006. Supervisor: M. Makula
− Székely, Ondrej: Symbolic approach to solving the problem of Copycat. May 2006. Supervisor: V. Kvasnička
− Tréger, Milan: Internet portal for manage student’s projects. May 2006. Supervisor: M. Makula
− Valachovič, Peter: Language as a small world network. May 2006. Supervisor: M. Markošová

Master (Ing.) Theses
− Feník, Andrej: Interactive collaborative three-dimensional visualization of models and data. December 2006. Supervisor: J. Žiak
− Fišlík, Andrej: Application of augmented reality in virtual reality walk. December 2006. Supervisor: M. Šperka
− Gono, Pavol: Detecting non-standard states in operating system. May 2006. Supervisor: B. Steinmüller
− Halák, Martin: Distributed data management in collaborative virtual reality. December 2006. Supervisor: J. Štefanovič

Kiselkov, Peter: Distributed data management in collaborative virtual reality. December 2006. Supervisor: J. Štefanovič

Komara, Martin: Global optimization using quantum computing. December 2006. Supervisor: V. Kvasnička

Prikryl, Peter: Occam Interpreter. December 2006. Supervisor: V. Solčány

Roháček, Marek: System for obtaining additional information in schedules design process. December 2006. Supervisor: M. Galbavý

Sabo, Michal: Automatic meter reading system for gas and water. December 2006. Supervisor: V. Vojtek

Straka, Vladimír: System for obtaining of additional information for schedules designing. December 2006. Supervisor: M. Galbavý

Szobi, Kristián: Tasks by approaches based on support vector machines. December 2006. Supervisor: M. Čerňanský

Sýkora, Peter: Computing Environment for Active File System. December 2006. Supervisor: B. Steinmüller

Tínes, Marián: Using knowledges in creation of the schedules. May 2006. Supervisor: M. Galbavý

Velický, Dušan: Time table optimize system. December 2006. Supervisor: M. Galbavý

Žáry, Ondrej: Detecting non-standard states in operating system. December 2006. Supervisor: B. Steinmüller
7.4 Research Laboratories

Laboratory of Database Technologies

Head: V. Vojtek
Contact: vladimir.vojtek@fiit.stuba.sk
Description: The laboratory is oriented towards support of research tasks, which use in some stages of solution a database environment, or which deal with security issues of database and information systems. Further application is in database application including multimedia applications, Global Information Systems, on-line transaction processing, on-line analytical processing, data-mining, data warehouses, internet access to databases, applications of CASE systems. The laboratory is equipped with SUN Enterprise 250 server and tens of SunRay workstations and some PC’s. Software equipment includes database environment Oracle 8.1.6, MySQL, PostgreSQL, MS SQL Server, and Progress v8.

7.5 Research Projects

Information infrastructure for embedded knowledge processing in distributed environment (VEGA 1/3103/06)

Project leader: V. Vojtek
Supported by: Scientific Grant Agency of the Ministry of Education of Slovak Republic and the Slovak Academy of Sciences
Duration: January 2006 – December 2008
Description: The goal of the project is a conceptual design of methods and tools for modelling and simulation of information infrastructure aimed to gather, store, process and present knowledge, which is scattered in a distributed environment of internet and various kinds of information, mobile and satellite networks. The next goal is implementation of information infrastructure subsystems, where it will be possible on organise knowledge into structures (on the basis of data mining methods) for knowledge processing, storing, presentation and visualization with help of augmented reality systems and multimedia tools. In this process the knowledge will be easily comprehensible for users. A pilot application will be targeted at e-learning and intelligent infrastructures. The presented goals are compatible with the strategic priorities of 7th EU Research Framework Programme.

Echo State Neural Networks (VEGA 1/1047/04)

Project leader: J. Pospíchal
Members: V. Kvasnička, M. Čerňanský, Š. Babinec, J. Babjak, P. Lacko, M. Makula, P. Sarkoci, P. Trebatický
Supported by: Scientific Grant Agency of the Ministry of Education of Slovak Republic and the Slovak Academy of Sciences
Duration: January 2004 – December 2006
Description: The goal of the project is to study a modern approach to recurrent neural networks, which is particularly suitable for both time series prediction and modelling of cognitive processes in artificial neural systems. Neural network in this approach includes a block of neurons with a recurrent architecture, which is randomly generated and the weight coefficients of its connections are fixed during the learning stage of the network. The input activities incoming to the neural network will be mapped onto a rich dynamic structure of activities of hidden neurons, which are used as an input to the output neurons layer. The learning of this network consists in adjusting of weight coefficients between hidden neurons and output neurons. Weight coefficients between the hidden and the input neurons and in-between the hidden neurons are randomly generated and do not change during the learning stage. Current research emphasis is on an evolutionary improvement of networks bringing more robustness to the predictions quality.

Theoretical studies and applications of neural networks with "echo states" in artificial intelligence and cognitive science (APVT-20-002504)

Project leader: V. Kvasnička
Members: J. Pospíchal, M. Čerňanský, Š. Babinec, J. Babjak, P. Lacko, M. Makula, P. Sarkoci, P. Trebatický, Š. Sudolský, V. Solčány
Supported by: Slovak Research and Development Agency
Duration: January 2005 – December 2007
Description: Neural networks with echo states are studied, which are currently considered as one of the greatest innovations of neural networks towards the increase of their biological plausibility. The project studies micro neural structures containing several hundreds of neurons, while the adaptation affects only the connections between hidden and output neurons with 1-step learning methods. Time in these networks is discrete, which allows also a simple introduction of a communication by spikes on synaptic connections between neurons. We are interested first in smaller modules - networks solving simpler tasks. By combination of these modules into greater wholes we shall obtain neural networks capable to solve also complex tasks. The model should be an important tool for modelling of reasoning processes and classification in artificial intelligence and cognitive science.

Theoretical study and practical applications of recurrent neural networks based on architectural bias (APVT-20-030204)

Project leader: M. Čerňanský
Members: M. Makula, P. Trebatický, P. Lacko
Supported by: Slovak Research and Development Agency
Duration: January 2005 – December 2007
Description: Markovian architectural bias is a property related with a fixed point attractor state space dynamics of architectures with recurrent connections. Models such as neural prediction machine and fractal prediction machine successfully use this type of dynamics, as well as the novel Echo State Networks with huge randomly interconnected hidden layer. We study the network’s state space dynamics and its
possible adjustment so some specific sequences can be successfully processed by proposed methods. We will specify practical problem domains (for example image or sound processing), where proposed approaches can be used.

**Interdisciplinary study Design of interactive digital media (KEGA-3/3206/05)**

*Project leader:* M. Šperka  
*Members:* A. Kovárová, M. Bielik  
*Supported by:* Cultural and Educational Grant Agency of the Ministry of Education of Slovak Republic  
*Duration:* July 2005 – December 2008  
*Description:* The goal of the project is to prepare conception of interdisciplinary study program “design of digital media” (design of Internet sites interface, interactive CD/DVD ROMs, user interfaces of the broad products spectrum - ranging from mobile phones, information kiosks, and automatic teller machines until the interfaces of complex control systems - which penetrate to all spheres of human activity. They need - besides the technological foundations (electronics and software) user friendly interface, too. The design of such interfaces requires the knowledge and skills from the informatics as well as from design fields. In many countries exist special university level schools dedicated to this area of study, but in Slovakia does not exist. Optimal solution is to create this study program in the frames of existing schools, e.g. Slovak University of Technology (Faculty of Informatics and Information Technologies and Faculty of Architecture) - where the necessary infrastructure already exists.

**Joint Degree in Media Development Engineering**  
*(29079-IC-1-2005-1-DK-ERASMUS-PROG/3)*

*Project leader* (Slovakia): M. Šperka  
*Members:* A. Kovárová, M. Galbavý  
*Supported by:* EU Socrates, Audiovisual and Culture Executive Agency, Brussels  
*Duration:* September 2006 – January 2010  
*Description:* Development of curriculum and implementation of a bachelor degree in media development that run simultaneously in Denmark (Herning), Belgium (Gent), Finland (Lahti), Poland (Bielsko- Biala), Slovakia (Bratislava), Spain (Terrassa). The studies will cover both technical and artistic aspects of media.

### 7.6 Publications

**Journals**

**International Conferences**

**Local and National Conferences**

**Books**

Abstracts

7.7 Cooperation

Cooperation in Slovakia

– Faculty of Social and Economical Sciences of Comenius University in Bratislava, Project of development of Cognitive Science (responsible person E. Gál, PhD.)
– Faculty of Mathematics, Physics and Informatics of Comenius University in Bratislava, project of development of Cognitive Science (responsible person J. Šefránek, Assoc. Professor, J. Rybár, Assoc. Professor)
– Faculty of Electrical Engineering and Informatics, Technical University of Košice, Development of modern methods of education in Computational Intelligence (responsible person P. Sinčák, Professor)
– Faculty of Mathematics, Physics and Informatics of Comenius University in Bratislava, Neural network modelling of complex systems (responsible person I. Farkaš, PhD.)
– Ministry of Economy of the Slovak Republic, design of information system

International Cooperation

– Neural and Knowledge Based Systems (Central European Exchange Program for University Studies). CEEPUS - HR - 6 Coordinator: S. Ribaric, University of Zagreb, Croatia. Subcoordinator for STU: V. Vojtek
– Institute fuer Softwaretechnik und Interaktive Systeme, Fakultät für Informatik, Technische Universität Wien, Austria (agreement about exchange of students)
– Institute Superieur d’Electronique de Paris (I.S.E.P.), Paris, France
– Institute Central European Initiative in Cognitive Science Education (joining universities in Vienna, Budapest, Zagreb and Bratislava) – preparation of common syllabus and mobility for students and teachers
– Faculty of Philosophy and Science, Silesian University in Opava, Czech Republic: Organisation of a seminar on Artificial Life and Cognition (responsible person J. Kelemen, Professor)
– Faculty of Mathematics and Natural Sciences II, Institute of Informatics, Humboldt University of Berlin, database and information systems
Visits of Staff Members

- **V. Kvasnička**: Cogscience seminar, University of Economics, Prague, Czech Republic, February 2-3, 2006
- **M. Šperka**: VOCINET Instructors Network Conference and Europrix Multimedia Top Talent Award Festival 2005, Vienna, Austria, March 3-5, 2006
- **J. Štefanovič**: Institut Superieur d’Electronique de Paris, France, May 22-28, 2006
- **V. Kvasnička, J. Pospichal, M. Čerňanský, P. Angelovič, P. Lacko, M. Makula, Š. Sudolský, P. Trebatický, J. Žiak**: Cognition and Artificial Life VI, Třešť, Czech Republic, May 28-June 1, 2006
- **J. Pospichal**: MENDEL 2006, Brno, Czech Republic, June 1-2, 2006
- **M. Čerňanský**: University of Birmingham, United Kingdom, June 6 – August 4, 2006
- **P. Lacko, M. Makula, P. Trebatický**: International Summer School on Pattern Recognition, University of Loughborough, United Kingdom, July 21-29, 2006
- **M. Šperka**: The e-learning 06 Conference, Universidade de Coimbra, Portugal, September 15-11, 2006
- **V. Kvasnička**: Cognition 2006, Prague, Czech Republic, October 5-7, 2006
- **V. Kvasnička**: Chaos and order in society and sociology, Charles University, Prague, Czech Republic, October 12-14, 2006
- **M. Šperka**: EADIM Academic Network Conference and Top Talent Award 2006, Vienna, Austria, November 24-26, 2006
- **A. Kovárová, I. Škovran, A. Fišlík, M. Komara, D. Lamoš, M. Jajcaj, V. Hlaváček**: Top Talent Award 2006, Vienna, Austria, November 14, 2006
- **P. Trebatický + 6 students**: Budapest University of Technology and Economics, Hungary, November 17-20, 2006
- **M. Šperka**: Socrates program “Media Development Engineering” meeting, KaHo Sint Lieven, Belgium, December 3-6, 2006

Visitors to the Institute

- **Stefan Larsson**, EON Reality, USA – Sweden, November 2006, short visit, received by M. Šperka
- 9 students from Institute Superieur d’Electronique de Paris (I.S.E.P.), Paris, France for 4-weeks study stay in June-July 2006, supervised by J. Štefanovič

7.8 Membership in Professional Organisations and Societies

Slovak Professional Organisations and Societies

The whole institute is a collective member of Slovak Artificial Intelligence Society.

**Vladimír Kvasnička**

- Slovak Academic Society (founding member, since 1997)
STU Faculty of Informatics and Information Technologies

- Slovak Artificial Intelligence Society (chairman, since August 29, 2000)
- Slovak Computer Science Society (member, since 1996)

Jiří Pospíchal
- Slovak Artificial Intelligence Society (member, since August 29, 2000)
- Slovak Computer Science Society (member, since 1996)

Martin Šperka
- Slovak Society for Informatics (member, since 2006)

International Professional Organisations and Societies

Martin Šperka:
- Europen Academy of Digital Media (EADIM) (fellow, since 2001)
- EADIM Instructors Network (vice chairman, since 2003)

Viliam Solčány
- ACM member (member, since May 2004)

Jiří Pospíchal
- EURO Working group on fuzzy sets (EUROFUSE) (member, since 1999)

Peter Trebatický
- IEEE (member, since 2006)

Michal Černanský
- International Neural Network Society (member, since 2006)

7.9 Other Activities

- Journal of Computing and Information Technology – V. Vojtek (since 1993), V. Kvasnička (since 2005): members of advisory board
- MATCH Communications in Mathematical Chemistry – V. Kvasnička (since 1998): member of advisory board
- Neural Network World – V. Kvasnička (since 2001): member of advisory board
- Croatica Chimica Acta – V. Kvasnička (since 2002): member of advisory board
- ITI 2006 – 28th International Conference on Information Technology Interfaces, Dubrovnik – V. Vojtek: member of programme committee
- Cognition and Artificial Life VI, Třešť, Czech Republic – V. Kvasnička, scientific guarantee of the event
- MENDEL 2006 – 12th International Conference on Soft Computing, Brno, Czech Republic – V. Kvasnička, J. Pospichal: members of programme committee
- SCCG 2006 – Spring Conference on Computer Graphics, Častá-Papiernicka Centre, Slovakia – M. Šperka: member of programme committee
- CESC 2006 – Central European Seminar on Computer Graphics, Častá-Papiernicka Centre, Slovakia – M. Šperka: member of programme committee
− WEBIST 2006 – 2nd International Conference on Web Information Systems, Setúbal, Portugal – M. Šperka: member of programme committee
− VU 2006 – 7th International Conference Virtual University, Bratislava, Slovakia – M. Šperka: member of programme committee
− Organisation of Artificial Intelligence Seminar
  www.fiit.stuba.sk/~kvasnicka/Seminar_of_AI
− Participation in a grant #3/3135/05 (KEGA - Cultural and Educational Grant Agency of the Ministry of Education) New forms of university study in Artificial Intelligence in Slovak Republic, in 1/2005 - 12/2007, main investigator – P. Sinčák, FEI TU Košice, investigator from FIIT STU – V. Kvasnička
− Participation in a grant # 3/3253/05 (KEGA - Cultural and Educational Grant Agency of the Ministry of Education) Art forms in communication design, in 3/2005 - 12/2007, main investigator L. Horník, investigator from FIIT STU – M. Šperka
The Institute of Computer Systems and Networks offers undergraduate and graduate study programmes covering a broad range of courses in Computer Engineering. Our courses are built on sound theoretical fundamentals and are oriented towards developing independent creative thinking and ability to design solutions or to solve complex problems in the field of engineering expertise.

These courses cover basics and principles of mathematics, physics, basics and computing, and concentrate mostly on the following domains: computer architecture, distributed systems and computer networks, design of digital systems, embedded systems.

The institute is responsible for education in the accredited degree programmes at each of the three levels of university education:

- Computer Systems and Networks (bachelor degree),
- Computer Systems and Networks (master degree),
- Computer Systems and Networks (doctoral degree).

The institute has been active and successful in research and reflects in research the current development of computer engineering in the world. Our research is funded by grants from the Slovak Research Grant Agency.

The dominant research interests of the institute include: design of digital systems and embedded systems, computer networks, creation of a novel effective formal specification tools, identification and implementation of automated engineering tasks in the area of HW/SW co-design of the mobile computing systems, development of new algorithms and methodology for providing reliability and fault tolerance, development of new approaches and methods for security enforcement in distributed systems and elaboration of new methodology for VLSI system design and testing at the functional level that is applicable for integrating into ASIC and PLD design.

### 8.3 Theses

#### Bachelor (Bc.) Theses

Božoňová, Zuzana: *Program system for creation of ordered binary decision diagrams*. May 2006. Supervisor: D. Kotmanová

Chovanec, Marián: *Some tasks of routing in computer networks*. May 2006. Supervisor: M. Kotočová

Fiala, Michal: *Design and implementation of program system for instruction pipeline graphic visualization*. May 2006. Supervisor: J. Hudec

Hudák, Rastislav: *Distributed computing*. May 2006. Supervisor: M. Kotočová

Majerník, Filip: *Implementation of security mechanisms in a system for remote access to the computer’s hardware*. May 2006. Supervisor: D. Bernát

Makový, Michal: *Storage information system*. May 2006. Supervisor: D. Malina

− Novická, Lucia: *HTML tuition program – how the data are represented in a PC*. May 2006. Supervisor: E. Tomalová
− Palkovič, Martin: *Automatic design of combinational logical circuits using MSI integrated circuits*. May 2006. Supervisor: M. Kolesár
− Pohronská, Mária: *Program system for microprocessor-based control unit design*. May 2006. Supervisor: P. Čičák
− Pristach, Juraj: *Distributed computes*. May 2006. Supervisor: M. Kotočová
− Rodák, Roman: *Demonstration examples of network communication*. May 2006. Supervisor: M. Kotočová
− Schwartz, Richard: *Design and implementation of the system for selected operations of computer memory subsystem graphical visualization*. May 2006. Supervisor: J. Hudec
− Szabó, Štefan: *Demonstration examples of network communication*. May 2006. Supervisor: M. Kotočová

Velecký, Michal: *Automatic design of logical combination circuit with one output of integration circuits SSI*. May 2006. Supervisor: M. Kolesár

Vesel, Marek: *Control of process creation*. May 2006. Supervisor: D. Bernát

**Master (Ing.) Theses**

Backo, Tomáš: *Software support of control unit development*. May 2006. Supervisor: P. Čičák

Hreňák, Martin: *Software support of selected measurements of electric machines*. May 2006. Supervisor: D. Malina

 Jánoš, Michal: *Defects in implementation of combination logic circuits*. December 2006. Supervisor: E. Tomalová

Komara, Martin: *Global optimization using quantum computing*. December 2006. Supervisor: V. Kvasnička
− Orfánus, Dalimír: Design and implementation of program support for modeling and verification of embedded systems in UML. May 2006. Supervisor: M. Kardoš
− Škříček, Pavol: Virtual kit of gate structured logical circuits. May 2006. Supervisor: M. Kolesár
− Štuller, Peter: Modification of measurement system with PC. December 2006. Supervisor: R. Kinder

**Doctoral (PhD.) Theses**

**Student name:** Martin Kardoš  
**Degree program:** Computer devices and systems  
**Thesis title:** Automated formal verification for UML-based model driven design of embedded systems  
**Supervisor:** Norbert Frištacký, Professor  
**Defended on:** February 17, 2006  
**Annotation:** The thesis aims at providing an approach for the automated formal verification of embedded systems modeled and designed using the Unified Modeling Language (UML). The focus is on the verification of platform independent UML models against functional properties expressed in the form of temporal logic formulae. Concretely, a novel verification approach is developed which supports fully automated verification of UML models expressed in the Verifiable UML,
a defined subset of UML 2.0 that contains diagrams to model the main aspects of an embedded system such as the architecture, behavior and the communication. To formalize the semantics of the Verifiable UML, the approach employs the formal method of Abstract State Machines (ASMs) and the Abstract State Machine Language (AsmL). As the verification method, the model checking technique is adopted and tailored for model checking of AsmL specifications, thus facilitating the verification of UML semantic models expressed in AsmL. The overall verification approach is evaluated on the Material Flow System case study that models distributed embedded software to control the manufacturing process of an assembly line.

Student name: Ladislav Huraj
Degree program: Applied informatics
Thesis title: Implanted chain certificate in distributed environment
Supervisor: Ladislav Hudec, Assoc. Professor
Defended on: October 6, 2006
Annotation: In ad hoc networks and other highly distributed and decentralized environments, authorization certificates and chain of them are used to control access. Moreover, it is possible to delegate rights listed in the certificate to other users. However, the size of these chains can become too long to be usable. The implanted chain certificate improves the time complexity of the verification of certificate chains. An implanted chain certificate (IChC) can be imagined as a certificate for a whole chain of certificates. The verification of IChC uses only a constant amount of cryptographic operations; therefore it is computationally more efficient when compared with the classical verification of the chain. In the dissertation, we present the IChC approach and focus on performance improvements of implanted chain certificates. Not only for long but even for very short chains – containing only four certificates – the IChC approach is much more efficient than the classical verification approach. In the dissertation we also present ubiquitous services of Implanted Chain Certificates Scheme in the network by voucher system and we provide some insights into the configuration of such security services in ad hoc networks.

8.4 Research Laboratories

Computer Networks Laboratory
Head: P. Čičák
Contact: pavel.cicak@fiit.stuba.sk
Description: The research and teaching laboratory is predefined for teaching computer networks to undergraduates and graduates in the study programme Computer systems and networks. The students are to show their practical and theoretical skills. They are involved in design, implementation and verification of applications for computer networks. The laboratory is equipped with modern network components and respective software tools.
Embedded Systems Laboratory

Head: T. Krajčovič
Contact: tibor.krajcovic@fiit.stuba.sk
Description: The research and teaching laboratory is predefined for teaching embedded systems, microprocessors and microcomputers, computer interfacing and digital equipment construction to undergraduates in the study programme Computer Systems and Networks, orientation in Computer Engineering. The students are to prove practical and theoretical skills. They are involved in design, implementation and verification of the applications for microprocessors and other digital devices in real-time applications. The laboratory is equipped with modern computers with internet connection and other hardware and software components and tools (logic analyzer, in-circuit emulators, Bluetooth development kits, Pentium II based embedded system development kit) necessary for practical teaching.

VLSI Design Laboratory

Head: J. Hudec
Contact: jan.hudec@fiit.stuba.sk
Description: The research and teaching laboratory is predefined for teaching of programmable logic devices in graduate study of Computer systems and networks, branch Computer engineering. The students are targeted for proving practical and theoretical skills. They are involved in design, implementation and verification of applications for programmable logic and gate arrays. The laboratory is equipped with modern computers with internet connection and other hardware and software components and tools (XACT for XILINX, SYNOPSYS) for programmable circuits PLD and FPGA practical teaching.

8.5 Research projects

Grid Computing Systems and its Components (VEGA 1/3104/06)

Project leader: L. Hudec
Supported by: Scientific Grant Agency of the Ministry of Education of Slovak Republic and the Slovak Academy of Sciences
Duration: January 2006 – December 2008
Description: Research aims of this project are the following: design and implementation an extension to the operating system kernel providing checkpoint and restore mechanism to the processes (numeric extensive calculations) of operating system; design and implementation of the distributed schedule algorithm that provides a node load balance in cluster based on neighbour node state knowledge; cluster model development as random graph; node and communication links failure
analysis that influences communication in network (ability of message to reach the destination node) in dependence on link failure and network topology; the RBAC security model application in grid environment; design and implementation of new security model in available grid environment; methodology development and implementation for scheduling steps of synthesis design models; development the search for design flows enabling smart design of digital systems; development of methods, design of algorithms and proofem the develop methods for embedded systems testing as a part of VLSI systems testing at the functional level.

- Spektrum, University News Periodical – M. Kolesár: member of the editorial board (since 2003)
The main mission of the Institute of Informatics and Software Engineering is to contribute to the mission of Slovak University of Technology and to the mission of the Faculty of Informatics and Information Technologies in the range of its competencies, in areas bounded by and related to informatics and software engineering; among the related areas, it is oriented especially to artificial intelligence in research of knowledge approaches in solving problems of informatics and software engineering, and to information systems respecting their close relation to typical problem domains in software engineering.

Within the mission, the institute especially

− contributes through its research to development of knowledge in the areas of science and technologies belonging to the mentioned areas,
− provides successful and high-quality study programmes in areas of its competencies at each of the three levels of university education, in which
  • graduates with the first degree will be excellently prepared for Slovak and European labour market and will be able to take care of themselves in their own business and also to create employment opportunities to others,
  • graduates with the second degree will have acquired competencies and abilities to be leaders of specialist teams with deep expert knowledge and ability of high creativity,
  • doctoral study graduates will be able to bring new original and innovative solutions of complex problems.

The institute is responsible for education in the following accredited degree programmes:

− Informatics (bachelor degree),
− Information Systems (master degree),
− Software Engineering (master degree),
– Software Systems (doctoral degree),
– Artificial Intelligence (doctoral degree).

The Institute of Informatics and Software Engineering fulfils the mission by the research activities relevant both in a national and international context and by extending, deepening and improving the offer of courses provided to students at all the three levels of university studies.

The Institute endeavours actively to cooperate. It includes interdisciplinary research and studies at other similar institutes, institutions and departments of its Faculty, its University, in Slovakia, in Europe and throughout the world.

The Institute aims at becoming the leading Slovak institution in the areas of its competencies with ambitions to positively influence their development. The Institute is conscious of its high responsibility to the public and it provides expert services to it, thus improving life of the town, the region, the country and the mankind. The Institute looks for synergies with industry and enterprise community, and jointly tries to raise research and education quality in the areas of informatics and information technologies.

**Doctoral (PhD.) Theses**

*Student name:* Zoltán Fazekas  
*Degree program:* Program and Information Systems  
*Thesis title:* Improving Variability in Software Configuration by Separation of Concerns  
*Supervisor:* Pavol Návrat, Professor  
*Defended on:* October 10, 2006  
*Annotation:* Configuration management is a common way of handling variation between versions of a software product. Variation can be expressed among others in terms of concerns (e.g. features) the product addresses. As far as such concerns are represented by single modules, they can be easily combined to build new versions of the software product. However, tangled or scattered concerns are not that easy to manage. Aspect-oriented programming modularizes scattered concerns. But even if aspect-oriented programming became a widely-used paradigm, not all variants of a system could be identified with a subset of aspects. There are concerns, which can neither be encapsulated in modules nor in aspects. They can be perceived as code modifications rather than code fragments such as modules or aspects. We propose ICCM, a new versioning model, which represents such concerns as a collection of fine-grained deltas. In ICCM, versions are obtained by composing deltas specified in terms of the intended concerns. CHAT is a prototype versioning tool integrating ICCM into an existing software development environment. Experiments with CHAT showed a
significant reduction in the overall time needed to create new versions of a software product.

9.4 Research Laboratories

Intelligent Systems Laboratory

Head: P. Návrat
Contact: pavol.navrat@fiit.stuba.sk
Description: The laboratory is used for research of a wide spectrum of problems that fall into the field of program and information systems mainly in the scope of artificial intelligence. The projects solved are concerned with the methods of knowledge system development with a special focus on multi-agent systems and their collaboration, as well as intelligent search, delivery, and presentation of heterogeneous information in a distributed environment such as Internet, including categorisation and recommendation of the information. The laboratory is equipped with fairly powerful computer systems and advanced software tools that correspond to the demands of the projects being solved. The equipment is regularly renewed thanks mainly to continuous success in grants including international ones.

Advanced Software and Web Technologies Laboratory

Head: M. Bieliková
Contact: maria.bielikova@fiit.stuba.sk
Description: The laboratory is used for research of a wide spectrum of problems that fall into the field of program and information systems mainly in the scope of software engineering. The projects being solved were concerned with the methods and tools of software system development with a special focus on the structure design of component-based and structure and presentation design of hypermedia systems. The laboratory is used also for research projects in the field of advanced software technologies for master degree students. The laboratory is equipped with fairly powerful computer systems and advanced CASE tools. The equipment is regularly renewed thanks mainly to continuous success in grants including international ones.

9.5 Research Projects

Software System Models in Semantic Web Environment (VEGA 1/3102/06)

Project leader: P. Návrat
Members: M. Bieliková, A. Bou Ezzeddine, R. Fílkorn, I. Kapustík, G. Kosková, L. Molnár, I. Polášek, I. Polický, V. Rozinajová, V. Vranič, A. Andrejko, G. Frivolt, V. Grlický, J. Jakubík, M. Košík, M. Lekavý
Supported by: Scientific Grant Agency of the Ministry of Education of Slovak Republic and the Slovak Academy of Sciences
Duration: January 2006 – December 2008
Description: Project focuses on research in the area of models and patterns application, namely in architectonic, analytical and compositional patterns.
These models are used in software systems development. Their primary goal is intelligent providing, analysis, and presentation of information in distributed environment of the semantic web in particular. Intelligent processing of information in distributed and heterogeneous environment of the Internet needs the adaptation in open information environment. To do so, methods for knowledge, adaptation and navigation modelling are needed. As an essential part of web software systems development, project includes also modelling of distributed and varying sources of data and information. In this sense, it is appropriate to use statistic models for knowledge discovery of hidden patterns in the data and their application for ontology generation and searching for patterns in new ontologies design and descriptions of semantics in general.

Theoretic and conceptual views of implementation of new functions into architectural heritage structure and their optimization with tourism as an example (VEGA 1/3300/06)

**Project leader:** Faculty of Architecture, Slovak University of Technology (for FIIT: P. Návrat)

**Members:** I. Kapustík

**Supported by:** Scientific Grant Agency of the Ministry of Education of Slovak Republic and the Slovak Academy of Sciences

**Duration:** January 2006 – December 2008

**Description:** This project handles principally new model, which implements new functions into existing architectural heritage structure. Exploitation of cultural heritage (including architectural) for actual functions of present society is one of principal requirements modern monuments preservation formulated on international level. Concurrently, there must be fulfilled requirement that cultural heritage values are preserved. While monument preservation theory expects this relation works automatically, reality is different: process of new function implementation is intuitive, random, not respecting objective correlation associations. Model example of new function is tourism. Project initiates activation of unused capacity of mutually supporting correlation associations to reach bilaterally satisfied collaboration. Model respects partial features of different architectural heritage types in different environment.

Modelling and Acquisition, Processing and Employing Knowledge about User Activities in the Internet Hyperspace (APVT-20-007104)

**Project leader:** M. Bieliková

**Members:** A. Bou Ezzeddine, I. Kapustík, M. Lekavý, Ľ. Majtás, Ľ. Molnár, P. Návrat, V. Rozinajová, V. Vranic

**Supported by:** Slovak Research and Development Agency

**Duration:** January 2005 – December 2007

**Description:** The project solves the current problem area of improving efficiency of the information providing and processing in the Internet. The primary approach used in this project comes from the idea to consider specific properties, habits and needs of the Internet web service user. By creat-
Research and Development of a Knowledge-Based System to Support Workflow Management in Organizations with Administrative Workflow Processes (APVT-51-024604)

*Project leader:* Institute of Informatics, Slovak Academy of Sciences (for STU: P. Návrat)

*Members:* M. Bieliková, A. Bou Ezzeddine, R. Filkorn, V. Imrecze, I. Kapustík, M. Lekavý, L. Majtás, L. Molnár, V. Rozinajová, V. Vranič

*Supported by:* Slovak Research and Development Agency

*Duration:* January 2005 – December 2007

*Description:* The project is aimed at creation of the knowledge-based system for workflow support with administrative focus based on multiagent technologies with the application of the ontological approach to modelling and capturing knowledge for their reuse in workflow control. The objective is a thorough analysis of knowledge in organisations, creating a knowledge model skeleton and design of methods for capturing, storing and creating knowledge. Development of methods for creating new knowledge is based on algorithms for reasoning on captured knowledge. In the area of reasoning according to existing cases (CBR), a methodology for development of a library of cases for administrative processes has to be created. Also, appropriate algorithms for searching for case similarity have to be found. A case here represents a historical event, which is characterised by the values of its attributes. This way it is possible to model experience of individual employees in maintaining their working activities. Each experience has to be captured in the context, which includes employee, working task, needed documents, and contacts.

Learning Programming using Adaptive Hypermedia System on the Internet (KEGA 3/2069/04)

*Project leader:* M. Bieliková

*Members:* R. Filkorn, I. Kapustík, J. Minárová, P. Návrat, G. Kosková, A. Považanová, V. Vranič

*Supported by:* Cultural and Educational Grant Agency of the Ministry of Education of Slovak Republic

*Duration:* September 2004 – December 2006

*Description:* The aim of the project is to improve e-learning methods and tools using adaptive web-based hypermedia. Our work is directed towards learning programming. We concentrate on design of architecture
of adaptive educational web-based system together with techniques for adaptation of educational content presentation (e.g. level of detail presented to a student), adaptation of the layout and adaptive navigation. As a main source of adaptation we consider a student with various characteristics related to learning (e.g., level of knowledge, preferences, previous work with the system). We expect devising new methods and techniques for learning programming using Internet and development of adaptive web-based system for learning programming using several programming paradigms.

Support of Young Research Workers Education with the Aim to Bring up Inventive Experts – Informatics Professionals – for Modern Society Based on Knowledge (JPD 3 2004/1-022, project code 13120200021)

**Project leader:** M. Bieliková
**Members:** L. Molnár, P. Návrat
**Supported by:** European Social Fund
**Duration:** December 2004 – December 2006
**Description:** The project is oriented towards a support of education of young researchers – PhD students. The value is in creating study materials for new PhD degree programmes realized at the Faculty of Informatics and Information Technologies, especially in software engineering. The project also includes financial support of PhD students in order to increase the number of young research workers with highest qualification.

Tools for Acquisition, Organisation, and Maintenance of Knowledge in an Environment of Heterogeneous Information Resources (2004 SP 20 06K 0A 01 /000 00 06)

**Project leader:** STU, P. Návrat
**Members:** UPJŠ Košice, UI SAV Bratislava, SOFTEC Ltd.
**Supported by:** State programme of research and development “Establishing of Information Society”
**Duration:** September 2004 – November 2007
**Description:** The subject of the project is the basic and applied research aimed at the work with knowledge in an environment of heterogeneous information resources. Internet and its services serve as an appropriate environment for the research of new approaches to acquisition, organisation, verification, evaluation, and maintenance of knowledge timeliness. Experiments will be performed also in an intranet environment. The objective is to explore the models needed to work with knowledge – the information content model, the user and context model – and to explore knowledge discovery methods with the use of ontologies. The project results are twofold: the main part represents the basic research results in the domain of knowledge life cycle support in an environment of heterogeneous resources, while the other is the result application in the development of tools and pilot systems aimed at work with knowledge.

Project leader: STU, P. Návrat
Contractor: A. Smrikarov, Angel Kunchev University of Rousse, Bulgaria
Countries: AT, BE, CZ, CY, DK, DE, EE, FI, GR, ES, FR, HU, IE, IS, IT, LU, LV, LT, MT, NL, NO, PL, PT, RO, SE, UK
Supported by: Socrates programme of the European Commission,
Duration: October 2004 – September 2007
Description: The general objectives of the network are to establish the principles of effective, high quality, Europe-valid doctoral studies and to develop the tools for doing this through analysis of the existing systems, exchanging experience and disseminating good practices among all partners. Using the most up-to-date information and communication technologies and the experience gained from the Virtual European Department of Computing (VEDoC), to help acknowledge doctoral studies as an important “third” cycle of education aiming at the achievement of European Dimension in Higher Computing Education and Training.

Teacher Induction: Supporting the Supporters of Novice Teachers in Europe (TISSNTE)

Project Leader: STU, V. Rozinajová
Contractor: J. Stephenson, Liverpool John Moores University, United Kingdom
Countries: AT, BE, BG, GR, HU, IE, LT, LV, PT, SK, UK
Supported by: Socrates programme of the European Commission,
Duration: October 2006 – September 2009
Description: The European Commission has developed a common European Framework for teacher competences and qualifications and the planned peer-learning cluster on teacher and training quality will enhance this movement. However, there is no common focus on the specific needs of new entrants to the profession or the concomitant needs of those who will induct and support them in schools. ‘Teachers Matter (OECD 2005) recognises and stresses the need for more attention to be given to the needs of novice teachers. In several EU countries, teachers, often given the title of mentors, have become a valued and integral part of the pre-service training of teachers in a few they are also involved in the induction and support of novice teachers. The aim of this project is to address the role of supporters; identify and analyse what currently takes place; devise instruments to identify the needs of mentors/supporters; facilitate cross European debate about ‘good practice’; formulate a portfolio of support strategies for those involved in supporting novice teachers; stimulate exchange between teachers and teacher educators and support of novice teachers.

Regional Networking Academy (RCNA FIIT STU) consists of three multipurpose research and pedagogical laboratory facilities designated for education in the field of computer networks at all three degrees of study programme Computer systems and Computer Networks and for education of subjects related to Computer Networking of the study programme Informatics.

Except filling study programs Regional Networking Academy provides complete courses and study programs in the field of computer networks as a part of Cisco Networking Academy Program. Throughout these courses students gain the necessary knowledge and practical skills to successfully pass Cisco Certified Networking Associate (CCNA) and Cisco Certified Networking Professional (CCNP) certification exams. These exams are well known and highly recognized by the industry. Education that is a part of the Academy offer complete spectrum of courses, starting with basic principles of how computer networks work and continuing with modern networking technologies such as IP Telephony and wireless communication based on IEEE 802.11 standards (WiFi). Laboratory facilities are equipped with modern communication technology including hardware routers, hardware switches, hardware firewalls, PCs with connection to the Internet and other necessary components for the purpose of practical education in the field of computer networks.

RCNA FIIT STU offers technological environment for research in the field of modern methods of communication in the computer networks. It creates quality conditions for solving research grants in the field of methods and resources for creating security and management of communication and mobile computer systems. Pedagogical process is greatly enhanced by providing the necessary support for practical learning during the education of subjects related to computer networking throughout all three degrees of study program Computer systems. Within the education process of RCNA prepares instructor training of 19 Local Cisco Networking Academies in the Slovakia and prepares students for CCNA and CCNP certification exams.
