

# EEDrive - Economical & Ecological Drive

Tomáš JENDEK

**Learn how to drive  
economically & ecologically**

**save your money and environment**

by using computer simulator

IIT SRC INVENT 2011

**Car simulator simulates real  
traffic situations and points to  
driving habits and bad driving  
technique.**

**The aim is to learn user drive  
effective, sparingly and ecologically**

Faculty of Informatics and Information Technologies

Simulator provides:

- information about current state of the fuel consumption
- possibilities of fuel conservation (vehicle automatically slows down at constant speed in front of traffic lights)
- statistics of drive review
