# Real Life Role-Playing Game for Children
(mobile application)

Let's put children inside the virtual reality, let them create virtual character based on themselves. Virtual character completes quests which represents child's real life tasks to do.

Child plays a game similar to the virtual role-playing game but it is the real world where the game is happening.

! The application gathers information about child's actions only, the game is played by child in real life.

Real life

Child is given task to do by its relative.

Child acts in real life.

Child completes the task.

+

+

= Child is rewarded by relative.

~

Virtual reality

Quest originator assigns quest to virtual character.

Virtual character completes the quest.

+

= Quest originator rewards virtual character.

I'm a hero!
