

Traffic aware alarm clock

Matúš TOMLEIN

This paper discusses a vision of a smart alarm clock that has some advanced abilities to determine the best time for a user to wake up to be able to commute to work or school on time. It also discusses a way of collecting and using current traffic information from users.

Traffic aware alarm clock

It knows where you want to get
and when you need to be there

It knows how to get you there

It knows about the traffic jams

It knows about your habits

||

It knows the best time to
wake you up.
