Preface

Research has been one of the main priorities of the university education since its very beginning. It is the case also for our university – the Slovak University of Technology in Bratislava and its faculty – the Faculty of Informatics and Information Technologies. Close connection of research and education leads very naturally to a participation of students in research. This holds not only the students of doctoral study, where research is a substantial part of their study and one of their principal activities. A participation of students in research is “going down” to students of master, even bachelor study.

Universities of technology have a long tradition of students participating in a skilled labour where they have to apply their theoretical knowledge. The best of these results were usually presented at various students’ competitions or exhibitions. There were also combined with student research works. Our university has a long tradition in such competition named ŠVOČ (abbreviation of the Student Scientific and Technical Activity). Eight years ago our faculty, FIIT STU, decided to transform former ŠVOČ into the Student Research Conference covering topics of Informatics and Information Technologies (IIT.SRC). Participants are students of all three levels of the study – bachelor (Bc.), master (Ing.) and doctoral (PhD.) study. The conference adopted a form of reviewing as at any other scientific conference, and presenting internally the papers in a form of internal Proceedings, which in most cases means a first step towards later publishing the results on national or international established conferences or journals.

IIT.SRC 2012 attracted 92 student papers from which 79 were accepted (18 bachelor, 41 master, 20 doctoral). The number of papers is rather stable. This year we have noticed an increase in bachelor category comparing to IIT.SRC 2011.

IIT.SRC 2012 was organized in five sections with papers in two categories – full papers and extended abstracts:

- Intelligent Information Processing,
- Web Technologies and Science,
- Software Engineering and Computer Science,
- Computer Systems, Computer Networks and Security,
- User Interaction, Computer Graphics, Image Processing.

The conference was opened by Keith G. Jeffery followed by a keynote titled The Challenges in ICT: Debunking the Hype. Keith is currently Director International Relations at STFC (Science and Technology Facilities Council). He previously had strategic and operational responsibility for ICT with 360,000 users, 1100 servers and 140 staff. His research interests include distributed computing with special emphasize to cloud computing, security and green computing.

Besides the 79 papers presented at the conference and included in these Proceedings several accompanying events were organized. The RoboCup Exhibition is organised as a part of IIT.SRC from 2005. RoboCup is an attractive project with free participation, designed to support education and research in artificial intelligence, robotics and information technologies. Through several years, our students achieved interesting results, which were presented during the conference. RoboCup exhibition presented both the way the RoboCup simulated league is played and also the progress of current students’ research in this field. Three years ago a new RoboCup league – three-dimensional (3D) robotic simulation was added. The extension of the simulation to the third dimension shows the continuous progress in RoboCup and in our students’ skills.

This year we organized for the fourth time as part IIT.SRC a showcase of TP-Cup projects. TP-Cup is a competition of master students' teams aimed at excellence in development information technologies solutions within two semester long team project module. The competition has four stages. 12 teams managed to achieve this stage and presented their projects during the TP-Cup showcase. Extended abstracts of their projects are included in these proceedings.

Accompanying events included for fifth time also our programming contest. It follows a long tradition at the Slovak University of Technology in Bratislava and our faculty in organizing programming contests, especially the ACM International Collegiate Programming Contest like competitions. This year we have organized for the first time the final round of the ProFIIT programming contest for high school students in parallel with IIT.SRC. Our aim was to show our potential future students exciting research opportunities awaiting them at our university.

We continued this year with FIITApixel exhibition. FIITApixel brings together both students and staff of the Faculty as well as its potential students and alumni in an effort to create, share and judge pictures. It is organized as an ongoing event, where anyone can contribute pictures. The IIT.SRC FIITApixel exhibition presented the best pictures of this year contest.

As a part of IIT.SRC we organized again this year an exhibition of three games with a purpose. Games with a purpose represent a way of harnessing the power of the human brain for producing useful artefacts or solving computational problems through computer gaming. They are interesting not only for the research opportunity itself but also for research promotion and popularization.

Nokia Lab has presented its activities at its presentation spot via several interesting applications whose development has been supported by the FIIT STU Nokia Lab.

New accompanying event this year was Junior IIT.SRC. Junior IIT.SRC provides a room for presenting inventive high school student projects within the topics of the conference. This year, three submissions were selected, first two dealing with an actual topic of electronic parliamentary elections (presenting either the potential platform and result analysis apparatus), the third presenting a smart portal for delivery of IT news and updates, focused on young audience.

IIT.SRC 2012 was the result of considerable effort by a number of people. It is our pleasure to express our thanks to:

- the IIT.SRC 2012 Programme Committee who devoted effort to reviewing papers,
- the IIT.SRC 2012 Organising Committee for a smooth preparation of the event,
- the students – authors of the papers, for contributing good papers reporting their research and their supervisors for bringing the students to research community.

Special thanks go to:

- Anton Andrejko together with Katarína Mršková who did an excellent job in the completion of the proceedings,
- Zuzana Marušincová and the whole organizing committee for effective support of all activities and in making the conference happen.

Finally we highly appreciate the financial support of our sponsors which helped the organizers to provide excellent environment for presentation of the results of student research and valuable awards.

Bratislava, April 2012

Pavel Čičák and Mária Bielíková

Conference Organisation

The 8th Student Research Conference in Informatics and Information Technologies (IIT.SRC), held on April 25, 2012 in Bratislava, was organised by the Slovak University of Technology (and, in particular, its Faculty of Informatics and Information Technologies) in Bratislava.

General Chair

Pavel Čičák (dean, Faculty of Informatics and Information Technologies,
Slovak University of Technology in Bratislava)

Programme Chair

Mária Bielíková

Programme Committee

Michal Barla	Gabriela Kosková	Pavol Návrat
Vanda Benešová	Margaréta Kotočová	Ivan Polášek
Michal Čerňanský	Ivan Kotuliak	Jiří Pospíchal
Pavel Čičák	Tibor Krajčovič	Viera Rozinajová
Peter Drahoš	Vladimír Kvasnička	Petr Šaloun
Elena Gramatová	Peter Lacko	Juraj Štefanovič
Pavol Horváth	Michal Laclavík	Jozef Tvarožek
Ladislav Hudec	Ján Lang	Michal Tvarožek
Daniela Chudá	Marián Lekavý	Valentino Vranič
Katarína Jelemenská	Pavol Mederly	
Peter Kapec	Ľudovít Molnár	

Organising Committee

Alexandra Bieleková	Ľubica Palatinusová
Mária Bielíková	Branislav Steinmüller
Ivan Kotuliak	Roman Stovíček
Zuzana Marušincová, <i>Chair</i>	Eva Urbaníková
Katarína Mršková	

all from FIIT STU in Bratislava, Slovakia

Financial and Prizes Sponsors

 **Medial Partner**

- PC Revue

Table of Contents

Keynote

The Challenges in ICT: Debunking the Hype <i>Keith G Jeffery</i>	xv
---	----

Intelligent Information Processing, Volume 1

Bachelor Degree Program Students

Validation of Music Metadata via Game with a Purpose <i>Peter Dulačka</i>	3
Email Events: Extracting and Adding to Calendar <i>Ivan Janovic, Filip Ogurčák</i>	9
Named Entity Recognition for Slovak and Related Languages <i>Ondrej Kaššák</i>	15
Building Domain Model via Game with a Purpose <i>Marek Kišš</i>	21
Using Trainable Duplicate Detection for Automated Public Data Refining <i>Martin Lipták</i>	27
An Evaluation of Individual Matching with TRREE Reasoner and SPARQL Based Inference <i>Marek Šurek</i>	33
Association Rules Mining from Context-Enriched Server Logs <i>Juraj Višňovský</i>	39

Master Degree Program Students

Action Recommendation Based on Situation Rules <i>Anton Benčíč</i>	45
Using Wi-Fi Mobility Classification on a Mobile Phone for Energy Efficient Activity Tracking <i>Pavol Bielik</i>	51
Personalized Text Summarization <i>Róbert Móro</i>	57
Achieving Interoperability among Heterogeneous Data Sources in Cultural Heritage Domain <i>Matúš Novotný</i>	63
Adaptation of Web Contents Browsed in Mobile Devices <i>Ján Sivulka</i>	69

Doctoral Degree Program Students

Topic Extraction in Text Documents Based on Word Position Analyses <i>Tomáš Kučečka</i>	75
Search in Source Code Based on Identifying Popular Fragments <i>Eduard Kuric</i>	83

Exploiting of Motivation and Player-Specific Expertises in Image Annotation <i>Jakub Šimko</i>	91
Context Inference Using Correlation in Behaviour <i>Dušan Zeleník</i>	99

Web Science and Technologies, Volume 1

Bachelor Degree Program Students

Enhancing Web Surfing Experience in Conditions of Slow and Intermittent Internet Connection <i>Luboš Demovič, Martin Konôpka, Marek Láni, Matúš Tomlein</i>	109
Social Web Search <i>Martin Gregor</i>	115
Keyword Extraction Based on Implicit Feedback <i>Jakub Kříž</i>	121
Using Social Media to Facilitate Face-to-Face Meetings <i>Jaroslav Michalco, Martin Liška</i>	127
Tag Recommendation System <i>Martin Plank</i>	133
Feedback Acquisition in Web-Based Learning <i>Andrea Šteňová</i>	139

Master Degree Program Students

Discovering Keyword Relations <i>Peter Kajan</i>	145
Trend-Aware User Modelling with Location-Aware Trends <i>Marcel Kanta</i>	151
Emotion Classification of Microblogs Based on Appraisal Theory <i>Peter Korenek</i>	157
Acquiring Web Site Metadata by Heterogeneous Information Sources Processing <i>Milan Lučanský</i>	163
Identifying Hidden Topics and Their Relations over Time in News Corpus <i>Martin Molnár</i>	169
Decentralised User Modelling and Personalisation <i>Márius Šajgalík</i>	175
Encouragement of Collaborative Learning Based on Dynamic Groups <i>Ivan Srba</i>	181
Modeling a Tutor for E-Learning Support <i>Peter Svorada</i>	187
Acquiring Metadata about Web Content Based on Microblog Analysis <i>Tomáš Uherčík</i>	193
Visualization of User Model in Educational Domain <i>Maroš Unčík</i>	199
Recognition of Semantically Related Articles in Wikipedia <i>Ivan Valenčík</i>	205

Doctoral Degree Program Students

Filtering Long Lists of Web Objects Using Automatically Generated Facets <i>Michal Holub</i>	211
Exploring Group Recommendation for Single-User Recommendation Tasks <i>Michal Kompan</i>	217
Analysing Temporal Dynamics in Search Intent <i>Tomáš Kramár</i>	225
Tracking of Parallel Browsing Behaviour <i>Martin Labaj</i>	233
Maintenance of Knowledge Tags in Heterogeneous Web Content: The Repository <i>Karol Rástočný</i>	241
Beehive Metaphor Inspired Web Crawler <i>Štefan Sabo</i>	249

Software Engineering and Computer Science, Volume 1

Master Degree Program Students

Aspect-Oriented Solution for Mutual Exclusion in Embedded Systems <i>Alojz Gomola</i>	257
Preprocessor for Aspect-Oriented Programming in Haskell <i>Miroslav Hruška</i>	263
Modelling Aspect-Oriented Design Patterns <i>Matej Lipták</i>	269
Extending the Method of Schedule Shortening for Schedule Simulation <i>Jaroslav Prokop</i>	275

Doctoral Degree Program Students

Appropriate State Evaluation in the Battleship Game Strategy <i>Ladislav Clementis</i>	281
An Approach to Partial Formalization of SOA Design Patterns Using Production Rules <i>Roman Šelmeci</i>	288

Computer Systems, Computer Networks and Security, Volume 2

Master Degree Program Students

NetLogo – an Alternative Way of Simulating Mobile Ad Hoc Networks <i>Miroslav Babiš</i>	299
A New Electronic Presentation System for Design and Test <i>Matej Hlatký, Valter Martinek</i>	305
Application of GPS Device as a Tourist Guide <i>Martin Jánoš</i>	311
Variometer with GPS Logger <i>František Kudlačák</i>	317
Digital Circuit Design and Simulation System Using Gesture Recognition <i>Jakub Polák, Tomáš Masaryk, Michal Behůň</i>	323
A Security Threat to IP Devices in Mobile Cellular Networks <i>Martin Nagy</i>	329
Control-Flow Checking Using Software Signatures <i>Hana Severínová</i>	335

Consistency in the Identity Management <i>Katarína Valalíková</i>	341
<u>Doctoral Degree Program Students</u>	
Information System Security Assessment Method Based on Security Mechanisms <i>Jakub Breier</i>	347
Wireless Remote Controller for Power Source Based on Embedded System <i>Peter Jombík</i>	355
Repair Analysis for Embedded Memories Using Block-Based Redundancy Architecture <i>Štefan Krištofik</i>	361
Evolution of Asynchronous Sequential Circuits <i>Michal Kudlačák</i>	369
Contribution to Visualization of HDL Model Simulation Results <i>Dominik Macko</i>	375
New Approach for Determining a VoIP Backbone <i>Martin Hrubý, Michal Olšovský</i>	383
<u>User Interaction, Computer Graphics, Image Processing, Volume 2</u>	
<u>Master Degree Program Students</u>	
Augmented Reality as an Interface for Learning Solid Geometry <i>Michal Barát</i>	393
Multi-Touch Interaction Technique Designed for Three-Dimensional Environments on the Screens of Mobile Devices <i>Filip Hlaváček</i>	399
Single Modality Medical Image Registration <i>Matej Kompánek</i>	405
Planar Object Recognition for Augmented Reality <i>Ján Kvak</i>	411
Image Segmentation Using Methods of Distributed Agents to Obtain Information from Medical Images <i>Marek Sobótka</i>	417
Mobile Device as an Intelligent User-Adapting Music Generator <i>Marek Takáč</i>	423
<u>Doctoral Degree Program Students</u>	
Evaluation of Image Segmentation Based on Histograms <i>Andrej Fogelton</i>	429
Performance Evaluation of Feature Descriptors for Visual Vocabulary Based Methods <i>Michal Kottman</i>	434
<u>Extended abstracts, Volume 2</u>	
Interactive Allocation of Taxi Customers for Taxi Services <i>Michal Behúň</i>	445
Automatic Control of Internet Radio <i>Michal Bystrický</i>	447
Music Melody Retrieval and Analysis <i>Gabriel Duchoň</i>	449

Forensic Tool for Collection of Digital Evidence in Linux Environment <i>Pavol Helebrandt</i>	451
Gathering Information on User Environment <i>Tomáš Jendek</i>	453
Full-Text Search in Email Archives Using Social Evaluation, Attached and Linked Resources <i>Vojtech Juhász</i>	455
Visual Based Query Construction to RDF Graph <i>Matúš Michalko</i>	457
Software Evaluation Driven Tool for Mobile Device <i>Peter Palát</i>	459
Environment for Low-Power Optimization of Multiplexer Trees <i>Jakub Polák</i>	461
Mobile Document Management <i>Michal Račko</i>	463
Active Conceptual Modelling of Learning Content <i>Ondrej Urban</i>	465
Solution Quality in Context of Web Service Composition <i>Lukáš Zboroň</i>	467

Accompanying Events, Volume 2

RoboCup Presentation at IIT.SRC 2012

<i>Pavol Návrat, Ivan Kapustík</i>	471
--	-----

Programming Contest at IIT.SRC 2012

<i>Peter Trebatický, Mária Bielíková</i>	473
--	-----

TP CUP – The Best Team Competition Showcase at IIT.SRC 2012

<i>Mária Bielíková</i>	475
Motivating People to Increase Physical Activity <i>Pavol Bielík, Peter Krátky, Štefan Mitrik, Michal Tomlein</i>	477
Motivating People to Healthy Lifestyle via Mobile Game <i>Roman Burger, Martin Džúr, Peter Meliško, Balázs Nagy</i>	479
Plagiarism Detection on the Web <i>Jozef Lačný, Maroš Maršálek, Pavel Michalko, Ján Súkeník</i>	481
Statistical Full Text Machine Translation <i>Róbert Horváth, Peter Jurčík, Peter Macko, Vladimír Ruman, Peter Sládeček, Maroš Ubreži, Matúš Vacula</i>	483
Crowd Simulation <i>Michal Fornádel, Marek Hlaváč, Martin Košícký, Lukáš Pavlech, Daniel Petráš, Adam Pomothy</i>	485
Mobile Navigation in Indoor Spaces Using QR Codes <i>Igor Aufricht, Samo Forus, Jozef Kujan, Dušan Poizl, Matej Škoda, Juraj Tóth, Juraj Volentier</i>	487
TrollEdit – Different Approach in Editing of Source Code Using Graphic Elements <i>Lukáš Turský, Jozef Krajčovič, Maroš Jendrej, Marek Brath, Ľuboš Staráček, Adrián Feješ</i>	489

Digital Scene – Kinect Based Gesture Recognizer in a Task of Event Management <i>Matej Kvitkovič, Andrej Lezo, Peter Mačuga, Lenka Neslušanová, Marek Račev, Michal Žilinčík</i>	491
Recommendation as a Service <i>Michal Cádrik, Martin Detko, Matej Mihalik, Igor Slotík, Jakub Ševcech, Ľudovít Mydla</i>	493
Management of Lightweight Semantic Content for an Adaptive Web-Based (Learning) Portal <i>Martin Franta, Martin Gajdoš, Martin Habdák, Róbert Kocian, Petra Vrablecová, Zuzana Zimová</i>	495
An Intelligent Game for Smart Phones <i>Máté Fejes, Ľuboš Gelányi, Ľuboš Masný, Juraj Mäsiar, Adam Mihalik, Dávid Pszota</i>	497
Knowledge and Skills of Students <i>Peter Ivanec, Jakub Šalmík, Patrik Polakovič, Michal Chylik, Anton Szórád</i>	499
Nokia Lab at IIT.SRC 2012 <i>Valentino Vranič, Ján Lang, Michal Čerňanský, Ivan Kotuliak</i>	501
Games with a Purpose at IIT.SRC 2012 <i>Jakub Šimko, Mária Bieliková</i>	503
FIITAPixel Exhibition at IIT.SRC 2012 <i>Pavol Návrat, Mária Bieliková, Ján Lang</i>	505
High School Students at IIT.SRC Junior 2012 <i>Mária Bieliková, Jakub Šimko, Dušan Zeleník</i>	507
